

**PC RESOLUTION NO. 2023-XX**

**A RESOLUTION OF THE PLANNING COMMISSION OF THE CITY OF HEALDSBURG RECOMMENDING THAT THE CITY COUNCIL ADOPT A MITIGATED NEGATIVE DECLARATION AND MITIGATION MONITORING AND REPORTING PROGRAM FOR THE FOLEY FAMILY COMMUNITY PAVILION PROJECT INCLUDING A GENERAL PLAN AMENDMENT, LAND USE CODE AMENDMENT, DESIGN REVIEW, CONDITIONAL USE PERMIT, HERITAGE TREE PERMIT AND RIPARIAN SETBACK VARIANCE LOCATED AT 3 NORTH STREET (APNS 002-173-002, 003, AND 021).**

**WHEREAS**, an application has been received from the City of Healdsburg Community Services/Parks and Recreation Department proposing a General Plan Amendment (GPA 2022-01), Land Use Code Amendment (LUA 2022-01), Major Design Review (DR 2022-03), Conditional Use Permit (CUP 2022-02), Riparian Setback Variance (V 2022-01), and a Heritage Tree Permit (HT 2022-01), for a proposal to rehabilitate the existing, approximately 13,300 square foot warehouse building to accommodate a community events pavilion to provide space for the Healdsburg Certified Farmers' Market and other community and private events on three contiguous parcels totaling 1.05 acres. The project will pave and stripe the existing gravel parking lot to include 42 surface public parking spaces. The project includes the removal of 2 Heritage trees; and

**WHEREAS**, the City of Healdsburg is the Lead Agency on the project and pursuant to Public Resources Code Section 21080.1 and Section 15063 of the CEQA Guidelines (Title 14, California Code of Regulations), an Initial Study was prepared for the project to determine whether there are potentially significant effects on the environment attributable to the project; and

**WHEREAS**, based on information contained in the Initial Study, included in the project file, that any potential significant effects of the project could be avoided or reduced to less than significant with the addition of mitigation measures, a Mitigated Negative Declaration was prepared for the project and was circulated for a 30-day public and agency review period, from February 13, 2023, to March 14, 2023; and

**WHEREAS**, a Notice of Intent to Adopt the Initial Study and Mitigated Negative Declaration was published in the Press Democrat (a newspaper of general circulation in the area), mailed to property owners within 300 feet of the project boundary, posted on-site, posted at the Office of the Sonoma County Clerk, and circulated through the State Clearinghouse; and

**WHEREAS**, the Mitigated Negative Declaration and supporting Initial Study were made available for public review during the public review period noted above; and

**WHEREAS**, the Mitigated Negative Declaration is incorporated herein by reference and all documents are available for review at the Healdsburg City Hall during normal business hours; and

**WHEREAS**, at a properly noticed public hearing on March 14, 2023, the Planning Commission reviewed the staff report, the MND (including appendices and any public and agency comments), took testimony and considered all comments received on the MND; and

**WHEREAS**, pursuant to CEQA Guidelines Section 15074, all documents and files which constitute the record of all proceedings upon which these recommendations associated with the Project were made are on file at Healdsburg City Hall, Community Development Center of the City of Healdsburg at 401 Grove Street, Healdsburg, CA 95448; and

**WHEREAS**, the MND includes a Mitigation Monitoring and Reporting Program, attached hereto as Exhibit “A” and incorporated herein by reference, consistent with the requirements of Public Resources Code Section 21081.6, which lists all of the mitigation measures, specifies the appropriate responsible party for implementing each mitigation measure and approximate time frames for implementing each mitigation measure; and

**WHEREAS**, the Planning Commission finds that, based upon the information contained in the Initial Study included in the Project file, it has been determined that there will be no significant environmental effects resulting from this project, provided that the identified mitigation measures are incorporated into the Project, and further that the Mitigated Negative Declaration has been completed in compliance with CEQA State and City Guidelines and the information contained therein has been duly reviewed and considered by the Planning Commission; and

**WHEREAS**, the Planning Commission reviewed and considered the MND prepared for this project together with comments received during the public review period prior to making its decision to approve the Foley Family Community Pavilion project subject to the adoption of the MND and approval of the General Plan amendment and Land Use Code amendment by the City Council.

**NOW, THEREFORE, BE IT RESOLVED** that the Healdsburg Planning Commission recommends the City Council adopt the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program for the project at 3 North Street (APNs 002-173-002, 003, and 021).

**DULY AND REGULARLY ADOPTED** by the Healdsburg Planning Commission on the 14th day of March 2023, by the following vote:

AYES:

NOES:

ABSENT:

ABSTAIN:

Approved:

Mitigation Monitoring and Reporting Program  
Foley Family Community Pavilion

Mitigation Measure	Implementing Procedure	Monitoring Responsibility	Monitoring / Reporting Action and Schedule	Non-Compliance Sanction / Activity	MMRP Record Name / Date
<p><b>AQ-1:</b> BAAQMD recommended Best Management Practices (BMPs) to control for fugitive dust and exhaust during all construction activities shall be incorporated into all demolition, building and grading construction plans and require implementation of the following:</p> <ol style="list-style-type: none"> <li>1. All exposed surfaces (e.g., parking areas, staging areas, soil piles, graded areas, and unpaved access roads) shall be watered two times per day.</li> <li>2. All haul trucks transporting soil, sand, or other loose material shall be covered.</li> <li>3. All visible mud or dirt track-out onto adjacent public roads shall be removed using wet power vacuum street sweepers at least once per day. The use of dry power sweeping is prohibited.</li> <li>4. All vehicle speeds on unpaved roads shall be limited to 15 mph.</li> <li>5. All roadways, driveways, and sidewalks to be paved shall be completed as soon as practicable. Building pads shall be laid as soon as practicable after grading unless seeding or soil binders are used.</li> </ol>	<p>Incorporate into project design and print on construction documents (demolition, grading and building plans). On-site observation.</p>	<p>Planning and Building Department Project Applicant/ Contractor</p>	<p>Verification of incorporation into project design and construction documents prior to issuance of grading permit. Monitor during regularly scheduled inspections to verify that measures are in place.</p>	<p>Deny issuance of grading permit. Stop work.</p>

<p>of bat activity: between August 31 and October 15, when bats would be able to fly and feed independently, and between March 1 and April 1 to avoid hibernating bats, and prior to the formation of maternity colonies. At least 14 days prior to demolition, a qualified biologist with at least two years of experience surveying for bats, should do preconstruction surveys for roosting bats. If the qualified biologist finds evidence of bat presence during the surveys, then a plan for removal and exclusion shall be developed, in conjunction with the California Department of Fish and Wildlife (CDFW).</p> <p>If building removal must occur outside of the seasonal activity periods mentioned above (i.e., between October 15 and February 28/29, or between April 2 and August 30), then a qualified biologist, with at least two years of experience surveying for bats, shall conduct preconstruction surveys within 14 days of starting work. If roosts are found, a determination should be made whether there are young. If a maternity site is found, impacts to the maternity site will be avoided by establishment of a non-disturbance buffer until the young have reached independence. The size of the buffer zone</p>	<p>construction plans and print on construction plans.</p> <p>Applicant shall provide the Planning and Building Department with the resume of the qualified biologist demonstrating bat survey and detection experience.</p> <p>Conduct pre-construction survey.</p> <p>On-site observation.</p> <p>If necessary, establish a protection buffer zone.</p>	<p>Project Applicant/ Contractor</p> <p>Qualified biologist</p>	<p>and during construction.</p> <p>Applicant shall provide the pre-construction survey to the Planning Department.</p> <p>Monitor during regularly scheduled inspections to verify that measures are in place.</p>	<p>appropriate buffer zone.</p>

<p>should be determined by the qualified bat biologist at the time of the surveys. If the qualified biologist finds evidence of bat presence during the surveys, then a plan for removal and exclusion shall be developed, when there are not dependent young present, in conjunction with the CDFW.</p>					
<p><b>BIO-2:</b> To avoid impacts to nesting birds, a nesting survey shall be conducted within 15 days of commencing construction work or tree removal if this work would commence between February 1 and August 31. The nesting survey shall include an examination of all buildings onsite and all trees onsite and within 200 feet of the entire project site (i.e., within a zone of influence of nesting birds), including trees to be retained onsite. The zone of influence includes those areas outside the project site where birds could be disturbed by earth- moving vibrations and/or other construction-related noise.</p> <p>If birds are identified nesting on or within the zone of influence of the construction project, a qualified biologist shall establish a temporary protective buffer around the nest(s). The nest buffer should be staked with orange construction fencing. The</p>	<p>Incorporate timing into project construction plans and print on construction plans.</p> <p>Applicant shall provide the Planning and Building Department with the resume of the qualified biologist demonstrating bird survey and detection experience prior to</p>	<p>Building and Planning Department Project Applicant/ Contractor Qualified biologist</p>	<p>Prior to issuance of grading permit and during construction.</p> <p>Applicant shall provide the pre-construction survey to the Planning Department.</p> <p>Monitor during regularly scheduled inspections to verify that measures are in place.</p>	<p>Stop work and establish appropriate buffer zone.</p>

<b>Mitigation Measure</b>	<b>Implementing Procedure</b>	<b>Monitoring Responsibility</b>	<b>Monitoring / Reporting Action and Schedule</b>	<b>Non-Compliance Sanction / Activity</b>	<b>MMRP Record Name / Date</b>
<p>buffer must be of sufficient size to protect the nesting site from construction-related disturbance and shall be established by a qualified ornithologist or biologist with extensive experience working with nesting birds near and on construction sites. Typically, adequate nesting buffers are 50 feet from the nest site or nest tree dripline for small birds and up to 300 feet for sensitive nesting birds that include several raptor species known to occur in the region of the project site but that are not expected to occur on the project site. Upon completion of nesting surveys, if nesting birds are identified on or within a zone of influence of the project site, a qualified ornithologist/biologist that frequently works with nesting birds shall prescribe adequate nesting buffers to protect the nesting birds from harm while the project is constructed.</p> <p>No construction or earth-moving activity shall occur within any established nest protection buffer prior to September 1 unless it is determined by a qualified ornithologist/biologist that the young have fledged (that is, left the nest) and have attained sufficient flight skills to avoid project construction zones, or that the nesting cycle is otherwise completed. In</p>	<p>conducting surveys. Conduct pre-construction survey. On-site observation. If necessary, establish a protection buffer zone.</p>

<p>the region of the project site, most species complete nesting by mid-July. This date can be significantly earlier or later, and would have to be determined by the qualified biologist. At the end of the nesting cycle, and fledging from the nest by its occupants, as determined by a qualified biologist, temporary nesting buffers may be removed and construction may commence in established nesting buffers without further regard for the nest site.</p>					
<b>CULTURAL RESOURCES</b>					
<p><b>CUL-1:</b> Prior to issuance of a Certificate of Occupancy, interpretive (aka informational) public signage shall be installed near or adjacent to the primary façade and adjacent to the reconstructed loading dock (ADA ramp) along the east elevation. Signage shall be adequate in size to attract the public and shall consist of a historical context for the fruit and nut packing facilities in Healdsburg and specific history related to the 1922 building, illustrating how the loading docks and the railroad functioned as part of the fruit and nut packing operations. Design and content of the sign shall be prepared in coordination with a qualified historian.</p>	<p>Incorporate into project design and print on construction documents (building plans) Review and approval by the Planning and Building Department</p>	<p>Applicant Planning and Building Department</p>	<p>Prior to issuance of certificate of occupancy</p>

Mitigation Measure	Implementing Procedure	Monitoring Responsibility	Monitoring / Reporting Action and Schedule	Non-Compliance Sanction / Activity	MMRP Record Name / Date
<p><b>CUL-2:</b> To ensure the project does not result in impacts to potential buried archaeological resources onsite, the following shall be implemented:</p> <p>1. <b>Archaeological Monitoring Plan and Site Monitoring.</b> Prior to ground-disturbing activities, a qualified archaeologist shall prepare a Monitoring Plan for the project. The Monitoring Plan shall describe the specific methods and procedures to be followed if archaeological deposits are identified. A Secretary of the Interior-qualified archeologist shall be retained to monitor all ground-disturbing activities. Archaeological monitors shall be empowered to halt construction activities at the location of a discovery to review possible archaeological material and to protect the resource while it is being evaluated. Monitoring shall continue until, in the archaeologist's judgment, cultural resources are not likely to be encountered. If archaeological materials are encountered during project activities, all work within 25 feet of the discovery shall be redirected until the archaeologist assesses the finds, consults with agencies as appropriate, and makes recommendations for the treatment of</p>	<p>Print on construction documents (grading plans), Pre-construction awareness training.</p>	<p>Planning and Building Department Project Applicant/ Contractor Qualified archaeologist</p>	<p>Prior to commencement of ground disturbing activities.</p>	<p>Deny issuance of grading permit.</p>

<b>Mitigation Measure</b>	<b>Implementing Procedure</b>	<b>Monitoring Responsibility</b>	<b>Monitoring / Reporting Action and Schedule</b>	<b>Non-Compliance Sanction / Activity</b>	<b>MMRP Record Name / Date</b>
<p>the discovery. If avoidance of the archaeological deposit is not feasible, the archaeological deposit shall be evaluated for its eligibility for listing in the California Register of Historical Resources. If the deposits are not eligible, mitigation is not necessary. If the deposits are eligible, adverse effects on the deposits shall be mitigated. Mitigation may include excavation of the archaeological deposit in accordance with a data recovery plan (CEQA Guidelines Section 151.26.4(b)(3)(C)) and standard archaeological field methods and procedures; laboratory and technical analyses of recovered archaeological materials; preparation of a report detailing the methods, findings, and significance of the archaeological site and associated materials; and accessioning of archaeological materials and a technical data recovery report at a curation facility. Upon completion of the assessment, the archaeologist shall prepare a report to document the methods and results of the assessment. The report shall be submitted to the City of Healdsburg and the Northwest Information Center of the California Historical Information Systems upon completion of the resource assessment.</p>

Foley Family Community Pavilion**

Mitigation Measure	Implementing Procedure	Monitoring Responsibility	Monitoring / Reporting Action and Schedule	Non-Compliance Sanction / Activity	MMRP Record Name / Date
<p>2. <b>Pre-construction Meeting.</b> Project supervisors, contractors, and equipment operators shall be familiarized with the types of artifacts that could be encountered during earth-disturbing activities and procedures to follow if subsurface cultural resources are unearthed during construction and an archaeologist is not present. Project supervisors, contractors, equipment operators, and all construction personnel on site shall be instructed not to collect artifacts if observed. To accomplish this, a professional archaeologist shall conduct a preconstruction meeting prior to commencement of ground-disturbing activities to familiarize the team with the potential to encounter prehistoric artifacts or historic-era archaeological deposits, the types of archaeological material that could be encountered within the project area, and procedures to follow if archaeological deposits and/or artifacts are observed during construction and an archaeologist is not present.</p>					
<p>3. <b>Post-review Discoveries.</b> If archaeological resources are encountered during construction and an archaeologist is not present, work shall be temporarily</p>
